Important Care Information

To maintain the finish and clarity of your porcelain picture or medallion:

- Do NOT use harsh or chemical cleaners. Products containing bleach, ammonia, acid or abrasives may permanently damage the surface.
- For gentle cleaning and removal of hard water stains, use a solution of white vinegar and baking soda OR rubbing alcohol only.
- Rinse with clean water and wipe dry with a soft cloth.

Following these simple care steps will help preserve the picture's original appearance.
